Nardi produce arredi per l'outdoor studiati per il benessere e il relax delle persone. Lavorare al fine di rendere i processi sempre più sostenibili è parte integrante della filosofia dell'azienda che nel 2019 ha inaugurato il programma industriale Regeneration dedicato alla produzione di arredamenti per esterno in plastica post consumo. Nello stesso anno ha introdotto le analisi LCA su diversi prodotti per mettere progressivamente in atto ulteriori azioni per migliorare le proprie performance ambientali.

Come tutta la gamma di arredi, anche quelli del catalogo Regeneration sono realizzati in impianti progettati con tecnologie all'avanguardia dal punto di vista dell'ecosostenibilità. Tutti gli stabilimenti utilizzano esclusivamente energia elettrica 100% green proveniente da fonti rinnovabili certificate insieme a quella generata dal proprio sistema di pannelli fotovoltaici.

Sempre in ottica ecologica, gli imballi di protezione sono in cartone certificato FSC® e polietilene a bassa densità completamente riciclabile, entrambi concepiti per essere ridotti al minimo. Le scatole contenitive di cartone sono composte mediamente dal 75% di fibre riciclate, con l'impiego di amido di mais come collante. Diverse sono, inoltre, le iniziative dell'azienda a favore di un corretto utilizzo e smaltimento degli imballaggi e dei bancali per il trasporto.

*Nardi produces outdoor furniture tailored to people's well-being and relaxation. Working to make processes increasingly sustainable is an integral part of the philosophy of our company which, in 2019, launched the Regeneration industrial programme dedicated to producing outdoor furniture in post-consumer plastic. In the same year, Nardi introduced LCA analysis on several products to gradually implement further actions to improve its environmental performance.*

*Like the entire range, the furniture in the Regeneration catalogue is made in production plants designed with state-of-the-art technology based on eco-sustainability. All production plants exclusively use 100% green electricity from certified renewable sources together with electricity generated by their own photovoltaic panel system.*

*Also in keeping with an eco-friendly perspective, protective packaging is made of FSC®-certified cardboard and fully recyclable low-density polyethylene, which are both designed to be minimised. On average, cardboard boxes are made of 75% recycled fibres, with maize starch used as glue. Several of our company initiatives also support the correct use and disposal of packaging and transport pallets.*
